The Who Behind Domain, IP & Cyber Threat Intelligence

Precise and Comprehensive IP Geolocation Coverage

Pinpointing IP geolocations and investigating IP address-related activities require access to accurate and up-to-date data points.

A major hurdle in collecting your own IP geolocation data is keeping up with constantly changing IP allocations—the information may already be outdated when your DIY IP geolocation data aggregation is done. Another obstacle is securing legal agreements with ISPs and regional Internet registries (RIRs). These and other challenges are avoidable by partnering with a reliable IP intelligence provider that updates its data daily and has long-term relationships with ISPs and RIRs.

Get access to exhaustive and accurate IP geolocation data to learn more about a given IP address.

Our long-term partnerships with the world's largest ISPs and RIRs enable us to offer comprehensive IP geolocation data covering 99.5% of all active IP addresses belonging to 13.1+ million IP netblocks and 28+ million unique IP ranges. Our products span 230,000+ unique locations and 65,000+ ASNs. We update our data in real time—specifically 45+ million IP records and 48,000+ IP ranges daily. We offer flexible plans so you can access our normalized and well-parsed IP geolocation data available in downloadable data feeds and via real-time APIs. Download our IP geolocation data samples or contact us for more information.

Practical Usage

Get the IP geolocation intelligence you need to:

- Augment the capabilities of your security and marketing platforms
- Obtain IP intelligence that covers precise location, connection type, and administering ISP details
- Reinforce statistical models for financial, marketing, and other business-related research
- Detect IP abuse and associations with known malicious domains

99.5% IP addresses in use tracked	**28+ million** Unique IP ranges	**45+ million** IP records updated daily
215,000+ ISPs	**48,000+** IP ranges updated daily	**230,000+** Unique locations covered

What Data Points Are Included?

Our IP geolocation intelligence includes relevant data points related to IP geolocation information, ASN details, connected domains, and more. See the table below for an overview of the data points in our records.

Data Points	Description
Location data	Country, region, city, latitude and longitude coordinates, postal code, and time zone
ISP	ISP to which the IP address is assigned
AS details	ASN, name, type, route, and domain
Connection type	Can be "modem," "mobile," "broadband," or "company"
Connected domains	List comprising up to five domains associated with the IP address

What IP Geolocation Data Delivery Models Do You Provide?

Delivery Model	Update Frequency
IP Geolocation API	Daily
IP Geolocation Lookup	Daily
IP Geolocation Data Feed – All Countries	Daily
IP Geolocation Data Feed – OFAC only Countries	Daily
Bulk IP Geolocation API	Daily
Bulk IP Geolocation GUI	Daily

About Us

WhoisXML API aggregates and delivers comprehensive domain, IP, DNS, and subdomain data repositories. WhoisXML API has more than 52,000 satisfied customers from various sectors and industries, such as cybersecurity, marketing, law enforcement, e-commerce, financial services, and more. Visit whoisxmlapi.com or contact us at sales@whoisxmlapi.com for more information about our products and capabilities.
